

### Advisory

Vapor Recovery CAP Handbook

Number 27 September 8, 1988

#### Vapor Recovery Self-Inspection Handbook

I am pleased to announce the availability of the Vapor Recovery Self-Inspection Handbook. This handbook was designed to provide the operators of service stations with a general overview of the most common vapor recovery equipment defects and to encourage routine equipment inspections to ensure continuous compliance with regulations. Observed defects which are less severe than those presented in the handbook may be violations in some air pollution control districts. All defects, regardless of size, should be repaired upon detection. For more specific information on the regulations in your area, please contact your local air pollution control district; a list of these districts is enclosed for your convenience.

This handbook is the first Compliance Assistance Program (CAP) industry handbook to be developed. The Phase I and Phase II Vapor Recovery category was selected because of the complexity of the vapor recovery regulations and the significant contribution these systems make to the control of hydrocarbon and benzene emissions.

I have enclosed a copy of this handbook. It is my goal to place them in each service station which is subject to Phase II vapor recovery requirements. Distribution is being handled by the local air pollution control districts. If you would like additional copies, please contact your local Air Pollution Control District office.

If you would like more information on this, please contact Laura McKinney at (916) 322-3976 or by writing to her at this address: Air Resources Board, Compliance Division, Post Office Box 2815, Sacramento, CA 95812.

James J. Morgester, Chief
Compliance Division
California Air Resources Board
Post Office Box 2815, Sacramento, CA 95812

### Advisory

# Independent Contractors

Number 27 November 2, 1988

#### **INDEPENDENT CONTRACTOR PROGRAM - APPROVALS**

Enclosed is a list of private contractors that have been approved to conduct compliance source testing on behalf of the Air Resources Board pursuant to Section 91200-91220, Title 17, California Code of Regulations.

The program is designed to approve independent contractors for sources who may choose to have them conduct compliance testing instead of the Air Resources Board. The Air Resources Board does not require that contractors be approved prior to testing in California. Approval is only required by the Board if the contractor wishes to test under this program. In order to obtain approval a contractor is evaluated against standardized criteria. All the contractors which are included on the list had the proper equipment and qualified personnel to conduct the tests listed at the time we evaluated them.

This list is updated and distributed each quarter. If you have any questions or would like information on a specific contractor or test between distributions, please call Mr. Raak Veblen at (916) 327-1519 or Mr. Roye Jackson at (916) 322-6033.

Enclosure

James J. Morgester, Chief
Compliance Division
California Air Resources Board
Post Office Box 2815. Sacramento, CA 95812
